Celuplast Window Accessory Range

The benefits of Celuplast PVC-ue for interior use.

Window reveals, architraves and skirtings are vulnerable to surface damage and general day to day wear and tear. Where traditional timber components have been used, these typically need regular maintenance to prevent deterioration, renewing paintwork to preserve appearances. Requirements that can be expensive, time consuming and often disruptive.

Celuplast make it possible to eliminate this repetitive agenda. Our range of windowboards, reveal liners, architraves, skirtings, angle trim and ancillaries, provide an attractive and effective, low-maintenance alternative to timber.

WINDOWBOARDS AND REVEAL LINERS

Direct Fix: Board (used as windowboard)

Bullnose Profile

Length: 5 metres

Technical Data

SUMMARY PRODUCT INFORMATION

MATERIAL

White profiles: extruded PVC-ue (polyvinyl chloride unplasticised expanded) with integral hard smooth finish (Warm White, Ice White and Brilliant White)

COLOURED VERSIONS

Woodgrain effect (Mahogany, Oak and Piedmont): PVC foil bonded onto white profiles

SIZES

All windowboards and trim: 5 metre standard lengths unless otherwise stated. Dimensions as detailed pages 6-13. All quoted dimensions are nominal.

Special lengths are available to order (subject to quantity)

PERFORMANCE IN FIRE

(to British Building Regulations 1985)

Class1Y to BS 476: Part 7 Surface Spread of Flame (Building Materials) on Elite Boards

MAINTENANCE

Wipe clean surface with damp cloth and suitable PVC-u cleaner

HEALTH AND SAFETY

No special precautions required in working the material other than those normally associated with use of hand and power tools, handling large boards, and control of dust.
